

Let's help ranger Dave complete the following tasks:

On a riverbank, there are many baskets (groups) of crocodiles. They are lying in groups of 10. Make a sum to work out how many crocodiles there are altogether.

Ranger Dave is following the footprints left by the animals after they left the watering hole. If there are 23 prints in each set and 3 sets how many prints are there altogether?

Sally the snake laid 26 eggs every year for the last 2 years. How many eggs did she lay altogether?
