

UNIT #3 – READING SECTION

NAME: \_\_\_\_\_

DATE: \_\_\_\_\_

**1** Listen and read. TR: 3.6

# Let's Go to the Aquarium!

Aquariums teach us about oceans, rivers, and wetlands. They also teach us about plants and animals that live in water. You can see interesting ocean animals at many aquariums.

The Shedd Aquarium in Chicago, USA, has more than 32,500 animals! Turtles, frogs, and fish are some of the animals. Some of the fish are zebra sharks. Baby zebra sharks have stripes like a zebra. You can also see shark eggs at the aquarium.

Aquariums are fun and interesting places to visit!

a baby zebra shark

You can take an elevator inside a really big aquarium in Germany. You can see more than 1,500 fish on your ride because the elevator is made of glass!
