

## Activity 2

Mariam and Sultan are learning about embedded systems. Help them to complete the activity below by filling in the gaps.

S	RTOS	software	time	three	microcontroller	debugger
---	------	----------	------	-------	-----------------	----------

**T** Embedded systems are made up of \_\_\_\_\_ important components. They are hardware, \_\_\_\_\_ and a real time operating system. There are a range of components found in the hardware of an embedded systems. Some examples include power supply, \_\_\_\_\_ and input/output. There are also a range of components found in the software of an embedded systems. Some examples include assembler, emulator and \_\_\_\_\_. A real time operating system, also known as \_\_\_\_\_ is used when a computer needs to react within a certain \_\_\_\_\_ to an input.
