

CALCULA

$$\text{a) } 1 + \frac{1}{2} = \frac{\boxed{\text{diagonal lines}}}{\boxed{\text{diagonal lines}}} + \frac{\boxed{\text{diagonal lines}}}{\boxed{\text{diagonal lines}}} = \frac{\boxed{\text{diagonal lines}}}{\boxed{\text{diagonal lines}}}$$

$$\text{b) } 1 + \frac{1}{4} = \frac{\boxed{\text{diagonal lines}}}{\boxed{\text{diagonal lines}}} + \frac{\boxed{\text{diagonal lines}}}{\boxed{\text{diagonal lines}}} = \frac{\boxed{\text{diagonal lines}}}{\boxed{\text{diagonal lines}}}$$

$$\text{c) } 1 + \frac{3}{5} = \frac{\boxed{\text{diagonal lines}}}{\boxed{\text{diagonal lines}}} + \frac{\boxed{\text{diagonal lines}}}{\boxed{\text{diagonal lines}}} = \frac{\boxed{\text{diagonal lines}}}{\boxed{\text{diagonal lines}}}$$

$$\text{d) } 3 - \frac{1}{7} = \frac{\boxed{\text{diagonal lines}}}{\boxed{\text{diagonal lines}}} - \frac{\boxed{\text{diagonal lines}}}{\boxed{\text{diagonal lines}}} = \frac{\boxed{\text{diagonal lines}}}{\boxed{\text{diagonal lines}}}$$
