To estimate the area

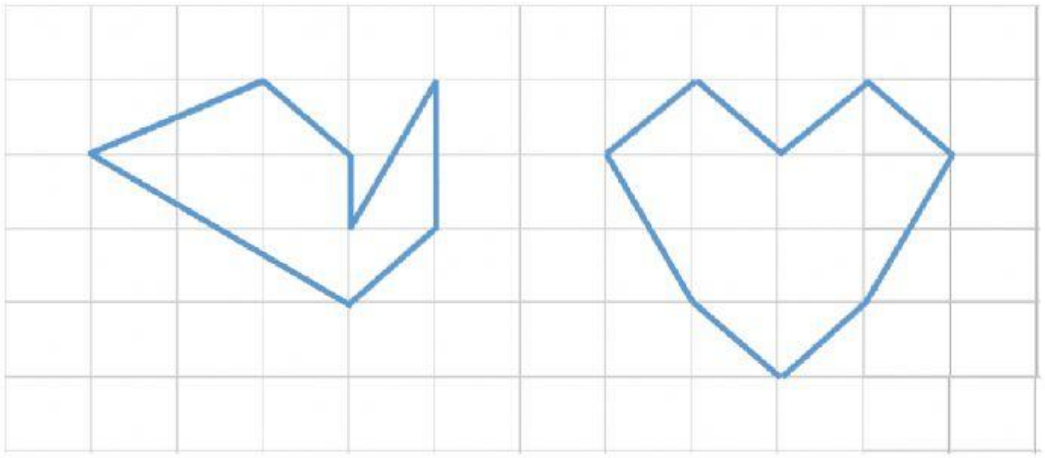

The picture on the rectangle has 5 full squares and 4 incomplete squares. It is estimated that the picture has an area of 7 square centimeters (cm2).

LIVEWORKSHEETS

Exercise 1 :

1. Estimate the area where one square is 1cm².

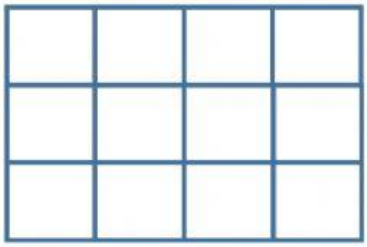

___cm²

___cm²

LIVEWORKSHEETS

Area of a rectangle

One square is 1 cm^2.

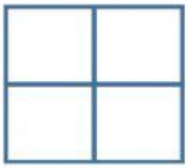

Along the long side, we can put 4 squares, and along the shorter side we can put 3 squares. Therefore this rectangle has

3 x 4 = 12 squares = 12 cm^2.

LIVEWORKSHEETS

Exercise: Find the area of these shapes.

1]

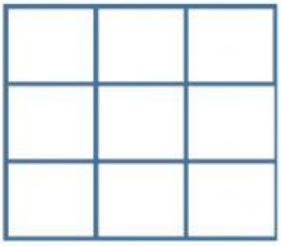

___cm^2

2]

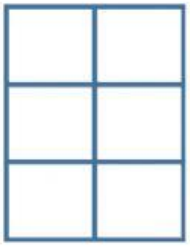

___cm^2

3]

___cm^2

4]

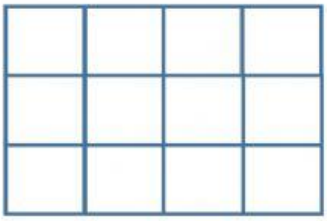

___cm^2

LIVEWORKSHEETS

Draw each of these rectangles in your book.
Divide the rectangles into squares.
Each square is 1 cm^2.

LIVEWORKSHEETS

In the table below the width and the length of each rectangle is given. Find the area.

Length cm	Width cm		Length cm^2
7	3	7 x 3 =	21
8	4		
5	4		
3	3		
9	5
