## Mathematics Multiplying Fractions

### Number Sentences

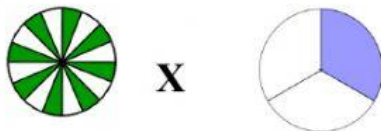

Based on the fraction bars/diagrams shown below, create a number sentence to match each diagram. Then solve each multiplication sentence.

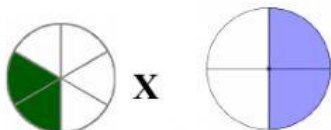

1.     $\frac{1}{8} \times \frac{3}{8} = \frac{\quad}{\quad}$     Simplified =  $\frac{\quad}{\quad}$

2.     $\frac{5}{8} \times \frac{4}{6} = \frac{\quad}{\quad}$     Simplified =  $\frac{\quad}{\quad}$

3.     $\frac{4}{8} \times \frac{3}{6} = \frac{\quad}{\quad}$     Simplified =  $\frac{\quad}{\quad}$

4.     $\frac{2}{6} \times \frac{2}{4} = \frac{\quad}{\quad}$     Simplified =  $\frac{\quad}{\quad}$
