Wed. Sept 22 Endangered Species Research

Directions: Fill out the answers below as you do research on your assigned endangered animal.

1. What is the name of your species?

2. Why is your species important to the ecosystem?

3. Why is your species endangered?

4. How do you think we can help this species survive?

Follow Up Questions: When you are done with your research, answer the three questions below.

1. What are some factors that contribute to a species' survival?

2. What are some characteristics that can help a species' reproduction so that it is able to survive?

3. Zoologists study animal behavior. What role do zoologists play to help endangered species thrive again?
