

True Value of a Digit

created by Kemisha Morgan

The value of a digit is the worth of it depending on where it is positioned or located in the numeral. We calculate it by multiplying the **place value** and **face value** of the digit.

Thousands	Hundreds	Tens	Ones
1,000	100	10	1

1. What is the value of the underlined digit 2?
2. What is the value of the underlined digit 199?
3. What is the value of the underlined digit 287?
4. What is the value of the underlined digit 463?
5. What is the value of the underlined digit 1,777?
