

RECYCLE

1) Read the text.

A New Life for Trash

The Earth is turning into a big garbage can. It is a big problem. But we can help the Earth by recycling.

Recycling means taking something old and making it new. We can recycle paper. This means old paper becomes new paper. We save trees and energy by recycling paper. We can also recycle glass.

People often throw away plastic. This is very wrong. It takes hundreds of years for plastic to break down. But if we recycle plastic, it can become many things. It can become a piece of furniture. It can become signs on the roads. It can even become garbage cans. Paper, glass, and plastic—they are all useful.

Some things cannot be recycled. Look for this special mark on things.

It means they can be recycled.

Next time, think before you throw something out. Recycling is easy to do. You can help clean the planet!

2) Choose the correct answer. *What is the text about?*

- a) *The importance of recycling.*
- b) *The importance of garbage.*
- c) *The importance of the planet.*

3) Answer the question: What does "*recycle*" mean?
