Oxford Discover 4 – 2nd Edition -

**INSTRUCTIONS:** Read the following definition and use the words in the word box to complete the idea.

billions   space   universe   imagine   Sun

The \_\_\_\_\_ is everything that exists, including objects and energy, throughout time and \_\_\_\_\_. Earth, the \_\_\_\_\_, and the rest of the solar system are only a very small part of the universe. The size of the universe is difficult to \_\_\_\_\_. It is so large that light from very distant objects in the universe must travel \_\_\_\_\_ of years before reaching Earth.

(Britannica Kids, 20021)
