

The Value of Digits

Created by Kemisha Morgan

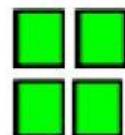

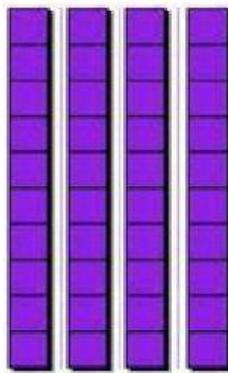

Expanded form is a great way of taking numerals apart to show the value of each numeral's place or the value of every individual digit. For example: $286 = 200 + 80 + 6$

Use your Base 10 Blocks to solve the following.

Find the value of each digit.

1.

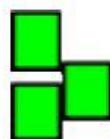

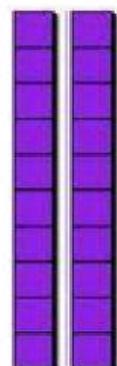

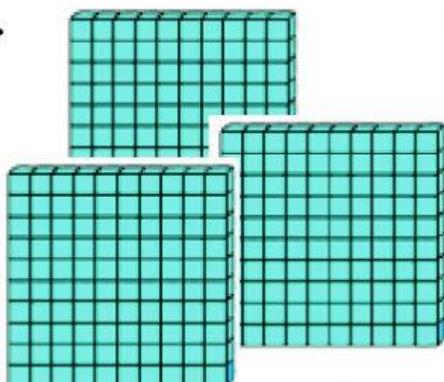

| | | |
|---|---|---|
| H | T | O |
|---|---|---|

$\times 1 =$

$\times 100 =$

$\times 10 =$

2.

| | | |
|---|---|---|
| H | T | O |
|---|---|---|

$\times 1 =$

$\times 100 =$

$\times 10 =$
