

ADICIÓN DE FRACCIONES

Nombre: _____

Resuelve todos los ejercicios de adición de números fraccionarios, con el proceso completo y el resultado con la simplificación:

$$1) \frac{20}{90} + \frac{11}{90} + \frac{75}{90} + \frac{33}{90} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$2) \frac{12}{64} + \frac{84}{64} + \frac{31}{64} + \frac{67}{64} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$3) \frac{27}{12} + \frac{69}{12} + \frac{99}{12} + \frac{64}{12} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$4) \frac{35}{96} + \frac{59}{96} + \frac{65}{96} + \frac{98}{96} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$5) \frac{70}{58} + \frac{33}{58} + \frac{90}{58} + \frac{45}{58} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

$$6) \frac{6}{17} + \frac{13}{30} = \underline{\hspace{1cm}} + \underline{\hspace{1cm}} = \underline{\hspace{1cm}} + \underline{\hspace{1cm}} = \underline{\hspace{1cm}} = \underline{\hspace{1cm}}$$

$$7) \frac{79}{3} + \frac{4}{68} = \underline{\hspace{1cm}} + \underline{\hspace{1cm}} = \underline{\hspace{1cm}} + \underline{\hspace{1cm}} = \underline{\hspace{1cm}} = \underline{\hspace{1cm}}$$

$$8) \frac{19}{68} + \frac{92}{96} = \underline{\hspace{1cm}} + \underline{\hspace{1cm}} = \underline{\hspace{1cm}} + \underline{\hspace{1cm}} = \underline{\hspace{1cm}} = \underline{\hspace{1cm}}$$

$$9) \frac{18}{77} + \frac{82}{86} = \underline{\hspace{1cm}} + \underline{\hspace{1cm}} = \underline{\hspace{1cm}} + \underline{\hspace{1cm}} = \underline{\hspace{1cm}} = \underline{\hspace{1cm}}$$

$$10) \frac{71}{77} + \frac{96}{46} = \underline{\hspace{1cm}} + \underline{\hspace{1cm}} = \underline{\hspace{1cm}} + \underline{\hspace{1cm}} = \underline{\hspace{1cm}} = \underline{\hspace{1cm}}$$
