Apply Troubleshooting Process to Hardware

Activity 6

Omar needs to verify his computer system functionality. Highlight or circle five steps in the table below that he can perform to verify the functionality.

Note: Some steps mentioned in the table are wrong so highlight the correct steps.

	Steps
Verify System Functionality	Reboot computer
	Playing a game
	Access all drives
	Validate the amount of RAM in use
	Watching videos
	Test network connectivity
	Listening to music
	Execute commonly used applications.
