

Water and Solutions: Properties of Water

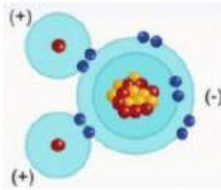

Name: _____

Drag and drop the parts to build the chemical formula of a water molecule.

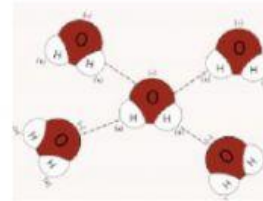

1. H 2 O

Match different properties of water.

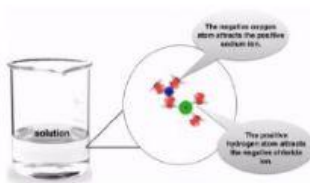

1.

2.

3.

4.

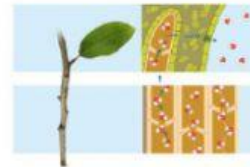

water droplets from leaky faucet

5.

insects can walk on the water surface

6.

water travels up the stem of a plant against gravity

Covalent bond

Hydrogen bond

Solubility

Cohesion

Surface tension

Capillary action
