

Mariam and Sultan are learning about primary memory.

Help them to complete the activity below by choosing whether the statements below are true or false.

Statement	True/false
Primary storage is also known as the 'main memory'	
RAM stands for 'Read-Access-Memory'	
Programs and documents load from the Hard Disk Drive and are then placed into RAM	
Data is written and read slowly in RAM	
RAM is volatile memory. This means that data is lost when the computer is switched off	
ROM is used to store the start-up instructions for the computer	
ROM is quicker than RAM	
ROM is known as non-volatile memory. This means that it is not lost when the computer is switched off
