

REVISION: GASES (HYDROGEN GAS)

1. Figure 1 shows dilute hydrochloric acid reacting with calcium carbonate. A gas is produced

Figure 1

- a) Name the gas collected in the test tube

_____ [1]

- b) Give a test for this gas

_____ [1]

- c) Give two properties of the gas collected

(i) _____

(ii) _____ [2]

- d) Hydrogen gas reacts with oxygen to form water

Explain why:

- i. hydrogen gas is an element

_____ [1]

- ii. water is a compound

_____ [1]

e) Give one use of hydrogen

_____ [1]

f) Complete the word equation below:

- Calcium + Hydrochloric acid → _____ + Hydrogen gas [1]
- Magnesium + Nitrate acid → _____ + _____ [2]
