Professor	Paul	Sereno	has				several	din	osaur
		in d							
		_ was in				. In A	Irgentina,	he an	d his
team									
the		One of	them he	named E	orapt	or, the	"dawn ra	ptor," ı	which
he determi	ned live	ed some	230 milli	on years	ago.	In th	ie		
Sereno led s	several	expeditio	ns to the	Sahara	Deser	t. Ther	e he foun	d more	than
100 tons of	fossils	including	many ne	w dinosa	ur			. One o	f the
	fo	mous dis	coveries	was duri	ing his	1997	expediti	on, whe	en he
discovered							107.0		
							s		
crocodile. I	t		_ some 1	10 millior	year.	s ago.	It was als	o durir	ng his
		expedition	on to the	Sahara D	esert	that S	Sereno dis	covere	d the
dinosaur Ni	gersaur	rus, or "N	Niger rep	tile," na	med o	ifter t	he count	ry of 1	Niger
where it was	s		Nigers	aurus wa	s fairl	y smal	l for a din	osaur,	about
the		0	f an ele	phant.	In 20	001 5	ereno and	d his	team
	to v	vestern a	nd centro	l India.	There	they o	discovere	d the I	ndian
subcontinen	t's firs	st meat-	eating di	inosaur			an	d name	ed it
Rajasaurus.	Later t	hat same	year, Ser	eno vent	ured i	nto the	e Gobi Des	sert fa	rther
north in Chi	ina. Ser	eno cont	inues to d	do ob			on seve	ral of	these
continents
