3. Read and complete the text with the correct option.

Robots That Feel?

But how about your cooked breakfast, and the umbrella and hat you found by the door? For those, you can thank your robot helper. Futurologists predict that many homes will have robots in the future. Robots already do many things such as building cars and vacuuming floors. But scientists today are starting to build friendlier, more intelligent robots—ones that people will feel more comfortable having around in the house. Sociable robots will be able to show feelings with their faces, just like humans. They will smile and frown, make eye contact, and speak. These robots will do work around the house such as cooking and cleaning. They will even take care of children and the elderly. How soon will this smart home be a reality? There's a good chance it will be a part of your life in 25 or 30 years, perhaps sooner. Much of the technology is already here.

1. How will robots be 30 years from now?

a. Friendlier, les intelligent, able to speak, be angry, and frown.
b. Friendlier, more intelligent, able to speak, smile and frown.
c. Faster able to cook, ride horses, cleand and teach.

3. From the Reading we can infer that:

a. Robots will be more humanlike.
b. Robot will be more important tan humans.
c. Tecnology is changing day by day.

2. Which activities will robots do?

a. Cook, clean, get your umbrella and hat ready, take care of children and elderly.
b. Cook, build, get your umbrella and hat done, take care of children and elderly.
c. Drive your car, take care the dog out, cook your dinner, go to work for you.
