

Exercise1: Match the 7 life processes (MRS GREN),
To their definitions by drawing a line.

Movement

This is when organisms get **bigger** or become more complex as they get older.

Respiration

This is the process of obtaining **food**. Animals consume (eat) other living things to get food. Plants make their own food by photosynthesis.

Sensitivity

This is the process of organisms **changing their position** in their environment.

Growth

This is the process that enables organisms to transform food into **energy** that their cells can use.

Reproduction

This is the process of organisms **detecting and responding** to changes in their environment.

Excretion

This is the process of organisms passing on their genes to their **offspring**.

Nutrition

This is the process of organisms removing any **waste** products from inside them.

2-I think I am a living thing because:

Use the following classification keys to place the animals in their correct boxes by dragging their names and dropping them where they belong.

Spotted fritillary

Hammerhead

Grey Wolf

Adonis blue butterfly

Shark

Robin

Macaque

Can it fly?

Yes

No

Does it have feathers?

Yes

No

Does it live in trees?

Yes

No

Does it have spots on its wings?

Yes

No

Does it live in water?

Yes

No
