NATURAL SCIENCE - UNIT 2 - 4TH LEVEL

1. Read the text:

Livestock farmers raise **animals**. They get **food**, such as milk, eggs and meat, and **materials**, such as leather and wool. Two examples of livestock farming are **cattle farming**, the raising of cows, and **poultry farming**, the raising of chickens and other birds.

Arable farmers grow different types of **crops**. When crops only need the water from rain to grow, it's called **dry farming**. Wheat and olives are dry crops. When farmers need to water their crops, it's called **irrigated farming**. Tomatoes and peppers are irrigated crops.

2. Now, read the sentences and write TRUE or FALSE:

a) Tomatoes and olives are irrigated crops. _____

b) The raising of chickens and other birds is called cattle farming. _____

c) Arable farmers grow different types of crops. _____

d) Livestock farmers get food such as milk, eggs and meat. _____

e) Arable farmers get materials such as leather and wool. _____
