## Complementos a 100

El complemento a 100 de 20 es 80, porque  $20+80=100$

El complemento a 100 de 75 es 25, porque  $75+25=100$

Escribe el número que completa la suma

|                                                                                     |                                                                                   |
|-------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------|
|    |  |
|   | $90+ \underline{\hspace{1cm}} = 100$                                              |
|                                                                                     | $80+ \underline{\hspace{1cm}} = 100$                                              |
|                                                                                     | $70+ \underline{\hspace{1cm}} = 100$                                              |
|  | $60+ \underline{\hspace{1cm}} = 100$                                              |

Escribe el resultado de las sumas

$60+40= \underline{\hspace{1cm}}$

$70+30= \underline{\hspace{1cm}}$

$80+20= \underline{\hspace{1cm}}$

$90+10= \underline{\hspace{1cm}}$

Elige la imagen que al sumar da 100

|                                                                                     |                                                                                     |
|-------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|
|  |  |
|                                                                                     |  |
