

Escribe las fracciones necesarias para representar los números decimales.

1. $0.492 = \frac{\quad}{10} + \frac{\quad}{100} + \frac{\quad}{1000}$

7. $0.437 = \frac{\quad}{10} + \frac{\quad}{100} + \frac{\quad}{1000}$

2. $0.385 = \frac{\quad}{10} + \frac{\quad}{100} + \frac{\quad}{1000}$

8. $0.847 = \frac{\quad}{10} + \frac{\quad}{100} + \frac{\quad}{1000}$

3. $0.523 = \frac{\quad}{10} + \frac{\quad}{100} + \frac{\quad}{1000}$

9. $0.238 = \frac{\quad}{10} + \frac{\quad}{100} + \frac{\quad}{1000}$

4. $0.981 = \frac{\quad}{10} + \frac{\quad}{100} + \frac{\quad}{1000}$

10.

5. $0.772 = \frac{\quad}{10} + \frac{\quad}{100} + \frac{\quad}{1000}$

$0.394 = \frac{\quad}{10} + \frac{\quad}{100} + \frac{\quad}{1000}$

6. $0.134 = \frac{\quad}{10} + \frac{\quad}{100} + \frac{\quad}{1000}$
