48. My teacher gave me some good _____ (ADVISE)
49. We've _____ books and clothes to the children in remote areas. (donation)
50. A balanced diet is essential for healthy _____. (GROW)

C. READING

Read the following passage and write True (T) or False (F)

Food and Health

The food we eat can affect our health in many ways. If we eat food that's contaminated with bacteria, we'll be sick and go to the toilet more often. We can also get sick if we eat dangerous foods like poisonous mushrooms or certain kinds of fish. These foods have short-term effects on our health, but food can also have long-term effects on our health.

These long-term effects vary depending on where we live and how much we eat. In a country with food shortages due to war or lack of rain, people might suffer from malnutrition. People with malnutrition lose a lot of weight and become very thin and weak. They can also develop long-term illnesses due to the lack of essential nutrients like vitamin C and iron.

People who overeat can become overweight, especially if they don't exercise. Being a little overweight isn't usually related to serious health problems but putting on more weight and becoming obese definitely is. This is because obesity is a major risk factor for many serious illnesses that can be fatal and shorten our lives by many years.

People who are suffering from malnutrition can usually recover by simply eating nutritious food, but people who are obese face a far more difficult situation. To recover they must lose a lot of weight by eating less and changing to a healthy diet. This can be very difficult to do, especially if they live in a place full of Western-style fast foods and processed foods. And even if they lose weight by going on a diet, most people soon return to their usual diet and put the weight back on. So learning about food and health and how to prevent obesity in the first place is one of the most important things we can learn.

Statements

51. The food we eat can affect our health in only one way.
52. We can also become ill if we eat harmful foods
53. People with malnutrition put on a lot of weight and become very strong.
54. People with malnutrition develop long-term illnesses due to the lack of vitamin C and iron.
