WEEK: 3

DATE:

TEACHER: Lic.

Miss
Diana TT

TOPIC: Health Effects of Air Pollution

Air pollution is considered as the major environmental risk factor in the incidence and progression of some diseases

BEFORE START:

✚ What pollution does to your health?

ACTIVITIES FOR YOUR PORTFOLIO

1. Match the descriptions with the correct images.

Green transportation ideas!

a. **Walking** is the easiest **solution** when it comes to eco-friendly transportation methods because it costs nothing. All you need to do is just **walk**! Benefits? Well, let's just say that you save money, and it is good for your health

ESCUELA DE EDUCACIÓN BÁSICA "PROVINCIA DE IMBABURA"

b. Another **eco-friendly** idea is **carpooling**, which means bringing people who go to the same location together in one car, so that there are less vehicles on the road. And, of course, the quality of the air will be better.

c. **Electric or hybrid vehicles** are a popular idea nowadays. Everybody talks about them because it's convenient for the **environment**. What do you need instead of gas? Basically, electricity! So, these cars charge as easily as your phones

2. Label the pictures with the sentences.

- a. Cars charge as easily as your phones
- b. Less vehicles on the road.
- c. Could go on foot to school with your mates

IMPORTANT: to include this activity in the Flapbook.
