Module 2:

Lesson 3: Tips and Markups

1.

The bill for a group of eight people at a restaurant was $125 before the tip was added. The group wants to add an 18% tip.

What will be the total bill including the tip?

2.

Check

Amy wants to tip her hairstylist 20% for a haircut that costs $48. What is her total bill with tip? Use any strategy.

3.

Example 2 Markup

The wholesale cost for each shirt at a clothing store is $17. The store manager plans to mark up the shirts by 125%.

What will be the selling price for each shirt?
