

Unit 2 – Lesson 2 Review: Parts of Plants

Select the words in the box to fill in the blanks.

stems	parts	space	different
-------	-------	-------	-----------

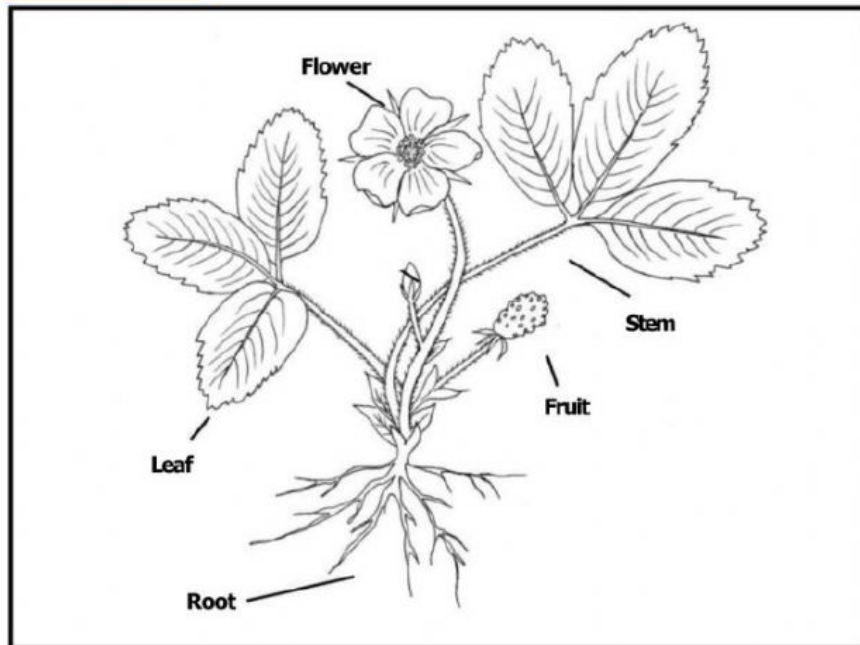

1. Plants have special _____ to help them get what they need to live.
2. Leaves, _____ and roots are some of these parts.
3. Plant parts look _____ on different kind of plants.
4. Plants also get what they need from the _____ around them.

Match each vocabulary word to the sentence that tells about it.

- | | |
|-----------|---|
| 1. leaves | a. These take in nutrients and water from the soil |
| 2. stems | b. These help plants get what they need to grow. |
| 3. roots | c. These carry food and water to the other plant parts. |
| 4. parts | d. These use sunlight and air to make food. |

Observe this diagram. The diagram shows the parts of plant. The plant's parts are labeled with words that tell you about the picture.

Strawberry plant

Study the diagram, then answer the questions.

1. What kind of plant is shown? How can you tell?

2. What plant parts connect the leaves and the roots?

Circle the best answer.

1. Which part of the plant can turn into the fruit?

flower

stem

2. What do the plant's leaves do?

hold the plant on

make food for the plant

3. What holds the plant in the ground?

flower

roots

Think and Write. Name two plant parts and tell what each part does.
