WEEK 39 WORKSHEET: COASTAL FEATURES (SPIT AND BARS)

The Formation of a Spit

1. Choose the statements listed below, drag and drop in the correct order of the formation of spit.

Order of its formation	Explanation
1	
2	
3	

- In a shallow and sheltered water, sediments will build up to form spit.
- Longshore drift transport sediments along the coast
- When the shape of coastline changes, longshore drift will continue to transport and deposit the sediment in the direction of longshore current

2. Study pictures below and match them with the correct name of coastal features.
