Read the passage and decide if the statement is True (T) or False (F):

Oxford is a city in England. It is the county town and only city of Oxfordshire. In 2017, its population was estimated at 152,450. It is 56 miles (90 km) northwest of London, 64 miles (103 km) southeast of Birmingham, and 61 miles (98 km) northeast of Bristol.

The city is home to the University of Oxford, the oldest university in the English-speaking world, and has buildings in every style of English architecture from late Anglo-Saxon. Oxford's industries include motor manufacturing, education, publishing, information technology and science.

The presence of the university has also led to Oxford becoming a centre for the education industry.

Companies often draw their teaching staff from the pool of Oxford University students and graduates, and, especially for EFL education, use their Oxford location as a selling point.

Question 11: Oxford is a county town.

Question 12: Distance from Oxford city to Birmingham is 56 miles.

Question 13: University of Oxford is the oldest university in the world.
