**EXERCISE 15.8: POLLINATION**

1. Complete the sentence using the words given below.

**Stigma**

**stamen**

**anther**

**pollen grain**

Pollen is created in the \_\_\_\_\_. Pollination happens when a \_\_\_\_\_ move from the flower's \_\_\_\_\_ to the flower's \_\_\_\_\_.

2. The parts of some flowers are described below. Write **insect** if you think they belong to insect-pollinated flowers or **wind** for wind-pollinated flowers.

a	The stigma is sticky	
b	The stamens hang loosely out of the flower	
c	The petals are brightly coloured	
d	The stamens are inside the flower	
e	The stigma is feathery	
f	The petals are small and green	
g	The flower is very small
