	types of rock is formed from solidification of magma?
	A. Extrusive Igneous rock
	B. Intrusive Igneous rock
	C. Metamorphic rock
	D. Sedimentary rock
_	found near volcanoes may classified as
_	A. Igneous rock
0	B. Sedimentary rock
0	C. Metamorphic rock
0	D. None of the above
Which	group of rock is formed through melting and solidifying?
0	A. Igneous rock
0	B. Sedimentary rock
0	C. Metamorphic rock
0	D. None of the above
	of the following rock is sedimentary rock?
0	A. Granite
0	B. Limestone
0	C. Marble
0	D. Slate
5. Which	group of rock was formed through compression and heating?
0	A. Igneous rock
0	B. Sedimentary rock
0	C. Metamorphic rock
0	D. None of the above
