A I'm leaving the office now. (6)_____ a message, please?

B (7)_____ you to her voice mail.

A Great. Thanks.

SECTION 3: READING

A Read the article and decide whether these statements are true or false.

- 1 Foxconn is a retailing company. ☒ True ☐ False
- 2 The company is planning to use more robots in its factories in the future. ☒ True ☐ False
- 3 Currently, salaries for workers in China are increasing. ☒ True ☐ False
- 4 Local governments are against Foxconn's expansion. ☒ True ☐ False
- 5 It isn't easy to install new robots in an old factory. ☒ True ☐ False
- 6 Foxconn currently has 300,000 workers in Chengdu. ☒ True ☐ False

Foxconn looks to a robotic future

By Kathrin Hille

Foxconn, one of the world's largest electronics manufacturers, is planning to have as many robots as workers in its China factories within three years, according to Terry Gou, chairman and chief executive.

Foxconn, China's biggest employer, produces Apple's iPad and other electronic gadgets. The group currently employs 1m workers but has just 10,000 robots on its production lines.

Mr Gou outlined the company's plans at a Foxconn gathering late last week in Shenzhen, a coastal manufacturing centre in southern China. According to people who attended the function, the chief executive said the group would have up

to 300,000 robots next year and 1m two years from now, highlighting the drastic changes China-based manufacturers are making as competition for labour increases.

'This is part of a broad automation push among China-based manufacturers,' said Alvin Kwock, head of hardware technology research at JP Morgan. 'It signals that the cost of labour is no longer lower than the cost of capital.' Salaries for migrant workers, the main part of Foxconn's China workforce, rose 30-40 per cent last year. And that trend is continuing.

Foxconn says it wants employees to move 'higher up the value chain beyond basic manufacturing work'.

Many local governments are hoping that Foxconn will create large-scale

employment in their backyards, and the group is building several large new factories in inland cities where labour costs are lower.

Analysts, however, believe the group's automation plans are an important part of its expansion strategy. 'Foxconn has been comparatively slow when it comes to automation,' said Mr Kwock. 'Automating an old factory is difficult because you then have to redesign the floor plan, so you want to introduce automation as part of a new plant.' In Chengdu, where one of the group's large new factories is located, government officials say Foxconn is expected to employ 100,000 workers by the end of the year and eventually reach a headcount of 300,000.
