**Answer the 17. and 18. questions according to the text.**

People are destroying tropical rain forests in Brazil. They want to make money by selling or using the woods after they cut down trees. Also, many farmers destruct the forest because they have more land for agriculture if there are no trees on the land. Technology helps them, too. Some new technology machines can cut fifty trees a day. So, Brazil is losing oxygen resources and wild life because there are thousands of animals that need rain forests to live.

**17. Which option is TRUE according to the text?**

- A) Rain forests are important for people and animals.
- B) Farmers in Brazil use solar energy for agriculture.
- C) Many people are using renewable energy to save the nature in Brazil.
- D) We need technology for the balance of the nature.

**18. What can be the best title for this passage?**

- A) Technology can save the nature.
- B) Brazil is using wind energy.
- C) Deforestation threatens Brazil.
- D) Animals and pollution in the rain forests.

**Answer the 19. and 20. questions according to the text.**

Temperatures are increasing because of the pollution. Global warming is causing big changes in our world. Climates are also changing. Animals and plants are trying to live with the changes. We must stop the speed of global warming because it threatens many of the species. If we don't do anything, they will be endangered, or even extinct. We are all responsible for our planet.

**19. - Why must we stop the speed of global warming?**

**- Because.....**

- A) green houses become useless.
- B) animals live in warmer places.
- C) lots of the species become endangered
- D) plants live longer.

**20. What can be the best title for this passage?**

- A) Climate
- B) Global Warming
- C) Temperature
- D) Our Planet

**Test bitti. Cevaplarınızı kontrol ediniz.**
