

THE TRICK THAT FAILED

Twin brothers Freddie and Felix often played tricks at school. One day they decided to try to (1) _____ on a French exam. Freddie was very (2) _____ learning languages and was always the best student in both Spanish and French. Felix, however, (3) _____ in mathematics. He was not interested in languages at all. When Felix discovered that he had to (4) _____ a standardized exam in French, he asked his brother for help. The day of Felix's test, they met in the boys' restroom during lunch and switched clothes. Freddie went to his brother's French class and took the (5) _____ for him. Meanwhile, Felix followed Freddie's schedule. After school, the twins laughed about their trick and headed home. As they entered the house, their mother called them into the kitchen. She was (6) _____! She had (7) _____ a phone call from the school principal. The French teacher (8) _____ about the trick! "How did he know?" cried Felix. "Easily," replied his mother. "Everyone at the school knows that one obvious (9) _____ between you and your brother is that you are right-handed, and Freddie is left-handed. While the French teacher was (10) _____ the tests, he noticed that the check marks on the test were (11) _____ by a left-handed person." Felix and Freddie got into a lot of trouble that day, but they (12) _____ a valuable lesson — and they never cheated again.
