

BACTERIAL CELL

A bacterium is a living thing. It is a single-celled organism.

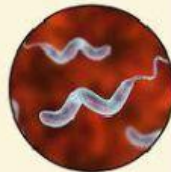

EXAMPLES OF BACTERIA

Spherical

Rod-like

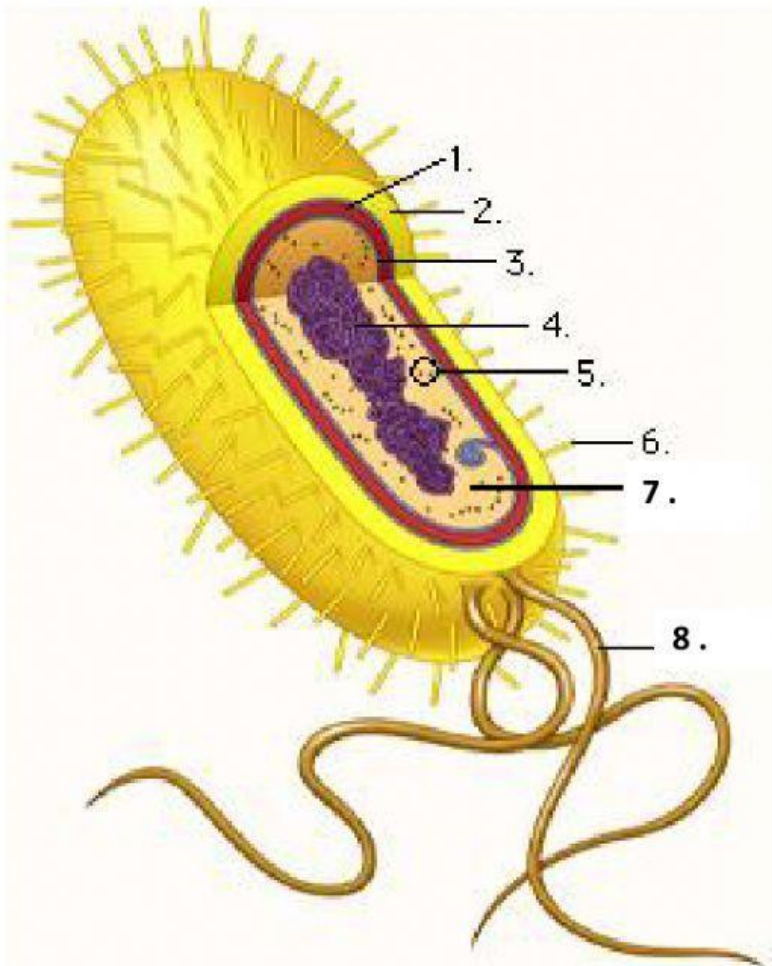

Spiral

Bacteria are microorganisms. They reproduce rapidly. They form colonies.

1-Label the main parts and organelles in a bacterial cell:

1.

2.

3.

4.

5.

6.

7.

8.

Capsule

Membrane

Cell wall

Pili

Ribosomes

Genetic material

Flagellum

Cytoplasm
