

Machines and energy:

1. Choose the right answers:

Simple machines

They often have one or two parts.

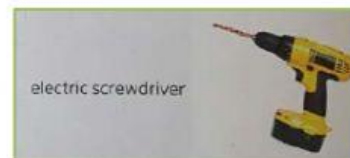

Sometimes they're a combination of different machines.

Complex machines

They are called tools

They have more than two parts.

2. Write "YES" or "NO" (in capital letters please).

Machine	Simple	Complex	Uses energy from people	Uses electrical energy
	X	✓		
				
				
				

3. Read and complete with the following words.

Pollution / electricity / fuels / burn / energy

All machines need to work.

Most machines that help us move . Examples are a car, a bus and a plane.

Other machines use . Examples are a hairdryer and an electric drill.

Some machines need energy from people to make them work. Examples are a stapler and a pair of scissors.

Nowadays, some machines use energy from the Sun, wind and water. They produce very little .
