

NAMA: _____

KELAS: _____

KIRA LUAS KAWASAN BERLOREK DAN PADANKAN DENGAN LANGKAH KERJA YANG BETUL.

$$18 \text{ cm} \div 3 = 6 \text{ cm}$$

$$p \times l = 6 \text{ cm} \times 10 \text{ cm}$$

$$= 60 \text{ cm}^2$$

$$p \times l = 7 \text{ cm} \times 10 \text{ cm}$$

$$= 70 \text{ cm}^2$$

$$p \times l = 12 \text{ cm} \times 4 \text{ cm}$$

$$= 48 \text{ cm}^2$$

$$\text{Jumlah luas} = 70 \text{ cm}^2 + 48 \text{ cm}^2$$

$$= 118 \text{ cm}^2$$

$$p \times l = 5 \text{ cm} \times 5 \text{ cm}$$

$$= 25 \text{ cm}^2$$

$$p \times l = 8 \text{ cm} \times 5 \text{ cm}$$

$$= 40 \text{ cm}^2$$

$$\text{Jumlah luas} = 25 \text{ cm}^2 + 40 \text{ cm}^2$$

$$= 65 \text{ cm}^2$$

$$\frac{t \times t}{2} = \frac{6 \text{ cm} \times 6 \text{ cm}}{2}$$

$$= \frac{36 \text{ cm}^2}{2}$$

$$= 18 \text{ cm}^2$$

$$\text{Jumlah luas} = 18 \text{ cm}^2 + 18 \text{ cm}^2$$

$$= 36 \text{ cm}^2$$

$$\frac{t \times t}{2} = \frac{15 \text{ cm} \times 8 \text{ cm}}{2}$$

$$= \frac{120 \text{ cm}^2}{2}$$

$$= 60 \text{ cm}^2$$
