Year 4 Mathematics-Term 1 Week 6 Lesson 1

LO: To recall division facts.

To divide by 6, we divide the number into 6 equal groups and look at how many are in one group.

 $12 \div 6 =$

Divide 12 into 6 equal groups.

Count how many there are in one group.

12 ÷ 6 = ____

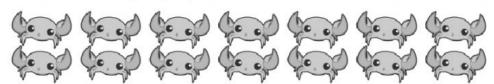

Complete the calculation.

Find the missing number in the calculation.

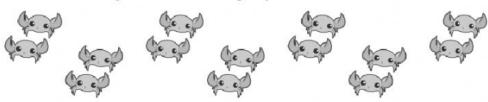

Challenge: I have 18 seeds. I plant 6 seeds in each pot. How many pots do I need? To divide by 7, we divide the number into 7 equal groups and look at how many are in one group.

 $14 \div 7 =$

Divide 14 into 7 equal groups.

Count how many there are in one group.

 $14 \div 7 =$

Complete the calculation.

Find the missing number in the calculation.

Challenge: There are some rocks at the beach.

Each rock has 7 starfish attached to it.

There are 35 starfish in total. How many rocks are there?
