

Given below are 10 stars. They are divided into groups of 2.

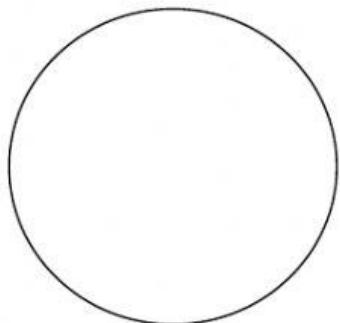

There are 5 groups of 2 stars each.

This can be written as $10 \div 2 = 5$

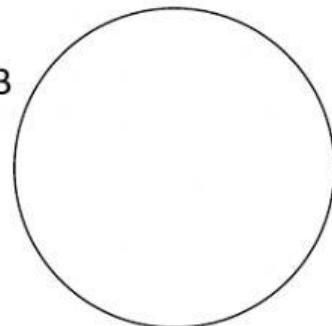

Divide the 6 candies equally between plates A and B. (Drag and drop)

A

B

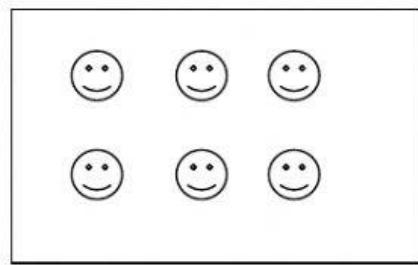

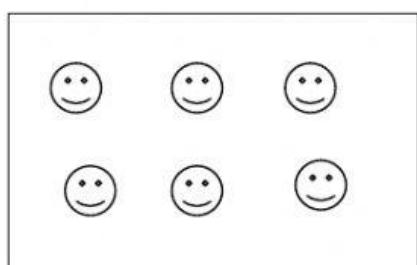

The 6 candies are shared equally between A and B

There are 3 in each plate.

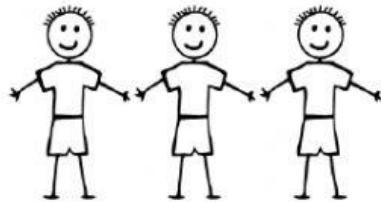

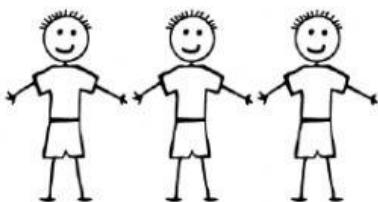

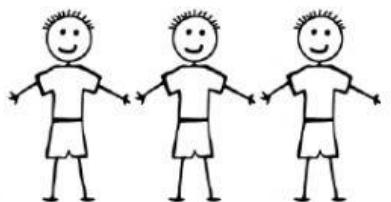

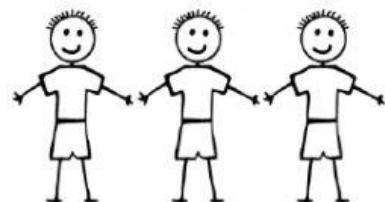

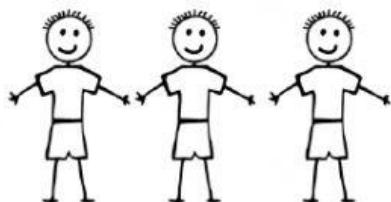

This can be written as $6 \div 2 = 3$

Write the division sentences for the following in the space given below:

12 Smiling faces divided into 2 groups

15 children have to stand in 5 groups. How many children stand in each group?

18 apples are shown above.

If these apples are shared equally between 2 people, how many will each one get?

If the 18 apples are equally shared by 3 people how many will each get?

If the 18 apples are shared equally by 6 people, how many does each one get?
