III. Read and do the tasks

Alexander Graham Bell is widely known as the inventor of the first telephone. He was born on March 3rd, 1847 in Edinburgh, Scotland. When he was 23, Bell emigrated to Canada with his parents and the next year moved to the United States to teach deaf-mute children. He took great interest in transmitting the human voice. With his colleague Thomas Watson, Bell worked very hard on the experimentation to invent devices such as the *harmonic telegraph* (used to send multiple messages over a single wire) and *phonautograph* (used to draw the shape of the sound waves). The first telephone communication was said to have happened between Bell and Watson in 1876 while Bell was at one end of the line, and Watson worked on the telephone in another room. The first transmitted words are, *"Mr. Watson, come here. I want to see you."*

*(**deaf-mute children**: trẻ câm điếc, transmit: truyền, phát, **harmonic telegraph**: (được dùng để gửi nhiều thông điệp trên một đường dây), **Phonautograph**: (được dùng để vẽ hình dạng của sóng âm)*
