Pair each picture with its instruction

Lab Safety Rules

Science labs offer great opportunities for learning, teaching, and research. They also pose hazards that require proper safety precautions.

Stay safe when conducting your labs by following these guidelines.

Dress appropriately
Tie back long hair, and wear suitable gloves, goggles, and other protective equipment.

Proper supervision
Don't perform lab experiments without instructor supervision (unless given permission to do so).

Know location of emergency numbers & safety equipment
Know the location of safety equipment and emergency phone numbers (such as poison control) so you can access them quickly if necessary.

No food
Don't eat or drink in the lab—and never taste chemicals.

ID hazards
Identify hazardous materials before beginning labs.

Be attentive
Be attentive while in the lab. Don't leave lit Bunsen burners unattended or leave an experiment in progress.

Be careful when handling hot glassware
Turn off all heating appliances when not in use. Keep flammable objects away from your workspace.

Keep a clean workspace
Don't obstruct work areas, floors, or exits. Keep coats, bags, and other personal items stored in designated areas away from the lab. Don't block sink drains with debris.

Handle glassware carefully
Properly dispose of anything that breaks. Report cuts, spills, and broken glass to your instructor immediately.

Clean up
After completing the lab, carefully clean your workspace and the equipment, and wash your hands.
