

## Unit 2: VIDEO WATCHING – SOLAR SOLUTIONS

### WHILE VIEWING

**A**  Watch the video. Check (✓) the goals of Thomas Taha Culhane's project.

- 1. to bring affordable hot water to residents of Cairo
- 2. to show Egyptians how they can save water
- 3. to increase awareness about the importance of recycling

**B**  Watch the video again and answer the questions below.

1. What are Culhane's solar-powered water heaters made from?

local \_\_\_\_\_ materials, \_\_\_\_\_ materials, and some \_\_\_\_\_

2. Why is Cairo well-suited to Culhane's project?

Cairo gets a lot of \_\_\_\_\_.

3. What is one problem with using solar panels in Cairo? What is a simple solution to this problem?

\_\_\_\_\_ from the nearby desert gets on the panels. A simple solution is to \_\_\_\_\_ the dust away.

2. What does the narrator say at the end of the video? Complete the sentence:

"One man's \_\_\_\_\_ is another man's \_\_\_\_\_."
