

AUTUMN

- Autumn is the season between summer and winter. I love summer because we have holidays and we usually go to the beach and have fun there, but my favourite season of the year is autumn. I know the weather is cooler but I like going to school and meeting my friends. My parents always take me and my brothers to the country to see the colours of the trees and the mountains. We have long walks and if the weather is warm we have a picnic in a special area.
- We celebrate Halloween in November and we always have a festival at school. We decorate the classroom, sing songs and the teachers bring some food. In the USA people call autumn fall because the falling of leaves from trees.
- This season is characterized by rites and traditions connected with food production. Animals gather food in preparation for the coming winter. Some birds migrate to the Equator to escape from cold temperatures.
- Do you like autumn or you prefer summer?

	TRUE	FALSE.
1. British call autumn Fall.
