| 35. A. Because | B. Although | C. If | D. But |

VII)-Read the passage, and choose the correct answer A, B, C or D for each question.

Approximately one in two thousand people in Viet Nam has a significant hearing loss. Students who have been deafened in early childhood can be very different to students who have lost hearing later in life in terms of educational disadvantage. For example, their range of vocabulary may be limited, which in turn may affect their level of English literacy.

Deaf and hard of hearing students can sometimes prefer visual learning strategies. This can be a challenge in an environment where much essential information is delivered exclusively by word of mouth.

Students with a hearing loss may need to use assistive technology to participate in class. This assistive technology can be the laptop where software such as Skype can be used to deliver interpreters or captioning. For some, it will be in the form of listening devices. For others, it will be a combination of technology that includes both listening devices and computer based software.

The impact of hearing loss can cause delays in receiving learning material. Students who need information transcribed from tape must sometimes wait for a significant period of time for this to happen. This needs to be considered in terms of developing suitable timelines for the completion of work for each student.

Students with hearing loss may appear isolated in the learning environment. The possibility for social contact and interaction with other students is often limited, and this isolation or separateness may have an impact on learning. Participation and interaction in tutorials may be limited. Students who cannot hear the flow and nuances of rapid verbal exchange will be at a disadvantage.

36. Students who have been deafened in early childhood can be very different to students who have lost hearing later in life because _____.
 - A. they have less disadvantage in English literacy
 - B. they have a more significant hearing loss
 - C. their vocabulary is good enough to affect their level of English literacy
 - D. they suffer from more difficulty in expressing their ideas
37. Assistive technology can help students with a hearing loss _____.
 - A. use software such as Skype to talk to interpreters
 - B. better integrate into the study environment
 - C. use listening devices and gain their hearing ability
 - D. deliver the captioning in order for them to understand
38. All of the following are true according to the text EXCEPT that _____.
 - A. students with hearing impairments prefer visual learning
 - B. assistive technology is useful to disabled students to follow education
 - C. deaf students can't complete their tasks in class
 - D. hearing ability may affect the level of language skills
39. Learning environment can have negative impact on deaf students when _____.
 - A. they get no help from their friends or little communication
 - B. they develop suitable timelines for the completion of work
 - C. they cannot hear the nuisance of rapid verbal exchange
 - D. interactions in tutorials may be limited in social contact

40. The word "timeline" in paragraph 4 is closest in meaning to _____.

- A. a line that shows the time in a day B. a plan which how long things will take
C. a point of time when thing completed D. a device which records the time

VIII)-Complete the conversation, using the sentences (A-F) given. There is one extra.

- A. Teachers encourage students to use campus support services available through Disability Resource Services.
B. After beginning introduction, you need to present new vocabulary in both spoken and written form.
C. Teachers allow students with disabilities to demonstrate understanding of course material using alternative methods, such as extended time limits, taped exams, oral exams, and so on.
D. Welcome to our special school for students with disabilities, Mr Thanh.
E. First, disabled students learn more readily if material is presented in as many ways as possible: visual, auditory, kinetic and tactile.
F. And nowadays teachers encourage disabled students to use current technology to improve learning: tape recorders, computers, calculators, electronic spellers, and so on.

Principal: (41) _____

Mr. Thanh: Good morning. I'm very proud if I can work here, but I don't have much experience. Could you share the practical ways to help students succeed in the classroom?

Principal: Certainly, Mr. Thanh. (42) _____

Mr. Thanh: Students suffering from impaired vision need to hear, or touch the material, and with impaired hearing, they need to see, or work with their hands.

Principal: You're right. I think you've got some experience already. (43) _____

_____.
You should describe orally any diagrams, charts used during the lesson.

Mr. Thanh: I'll select the adequate material such as video clips, audio files or pictures to do this. How can we make students understand the lesson more easily?

Principal: It is often easier for disabled students to learn after its practical application. (44) _____

Mr. Thanh: It sounds very practical. How about testing their knowledge and skills?

Principal: (45) _____

Mr. Thanh: Thank you so much.
