c) Listen and study the picture.

1 _____ 5 _____

2 _____ 6 _____

3 _____ 7 _____

4 _____ 8 _____

d) Listen and sequence the step below.

1 _____

2 _____

3 _____

4 _____

5 _____

6 _____

7 _____

8 _____

Observe your tornado

Tighten the connecting tube to the mouth of one of the bottles.

First, you need two empty plastic bottles, food coloring, some glitters, a spoon of dishwashing liquid and a connecting tube for the bottles.

Fix the other empty bottles to the other end of the connecting tube.

Flip the bottle over and give it a good shake.

Fill one bottle with water to two third of the capacity.

Pour in the glitters and you will see the glitters floating on the surface of the coloured water.

Put in a few drops of few food colouring and the dish washing liquid.
