

Grade 6 Angles Test

Name: _____

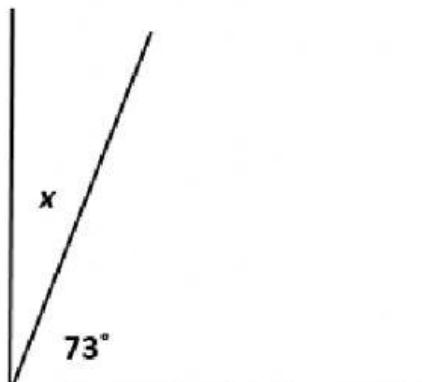

1. An angle is the amount of _____ between two _____ which are connected at a _____.
2. Angles smaller than a right angle are called _____.
3. Angles $>90^\circ$ and $< 180^\circ$ are called _____.
4. Angles are called _____ if the sum of their measurements add up to 90° .
5. Angles are called _____ if the sum of their measurements add up to 180° .
6. A right angle measures _____. This property is used to calculate the value of complementary angles.
7. A straight angle measures _____: this property is used when calculating the measurements of supplementary angles. It is also used when determining the _____ angles of a polygon.
8. Calculate the missing angle using what you have been taught about the properties of angles.

a. $\angle LKJ = 34^\circ$

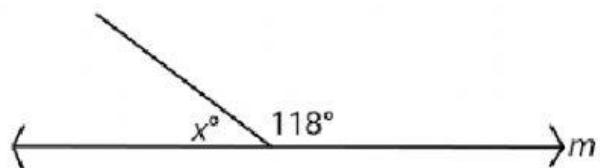

Therefore, $\angle GHI =$ _____

b. $x = \underline{\hspace{2cm}}$

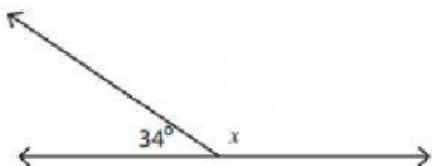

c. $x = \underline{\hspace{2cm}}$.

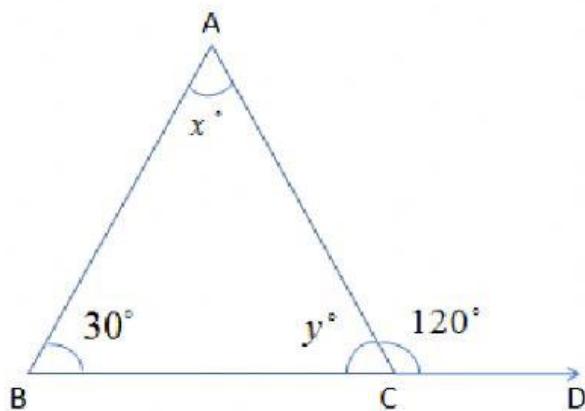

d. Look at the image **below**.

$$x = \underline{\hspace{2cm}}$$

$$x = \underline{\hspace{2cm}}$$

e. Look at the triangle below. $\angle ACB = \underline{\hspace{2cm}}$

f. Look at the regular quadrilateral below.

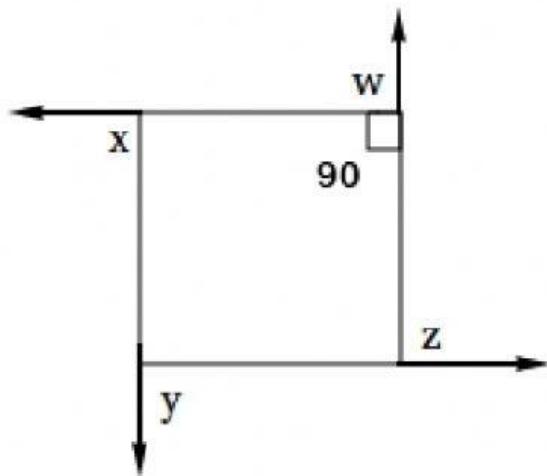

Calculate the value for the exterior angles w, x, z, y.

$$x = \underline{\hspace{2cm}}$$

$$z = \underline{\hspace{2cm}}$$

$$y = \underline{\hspace{2cm}}$$

$$w = \underline{\hspace{2cm}}$$

9. An angle that is $> 180^\circ$ but $< 360^\circ$ is called a _____ angle.

10. If someone is standing facing North and turns once, all the way around until they are facing North again, we can say they turned _____ $^\circ$.
