Circulatory System	a. This system is the controller of the body. Led by the brain and nerves, it allows us to move, talk and feel emotions.
Digestive System	b. This system of the body lets us breathe in oxygen with our lungs and breathe out carbon dioxide.
Nervous System	c. This system of the body is made up of the heart and blood vessels. The heart pumps blood through the blood vessels to bring oxygen to all parts of the body.
Skeletal System	d. This system of the body lets us break down the food we eat and turn it into energy.
Respiratory System	e. This system of the body is made up of our bones. It supports our body and protects our organs.
