## TASK B: Circle the correct words.

### CyberTracker

If you ever go (1) **on / at** safari, you may see huge herds of zebras, elephants and giraffes. But people are beginning to get concerned (2 ) **about / around** many species, because their natural habitat is starting to disappear and this could lead (3) **on / to** them coming (4) into / under threat.

Conservationists are looking (5) **for / from** answers and have turned to animal trackers for their help. Animal trackers are experts (6 ) **on / at** the animals which live on their land. They know what they eat and drink and where they sleep. However, there is a problem with relying (7) **on / in** them for information: they aren't always able to communicate (8) **with / from** the conservationists because they often don't read or write.

This is where technology has been helping out. Software developed by CyberTracker Conservation in Africa allows animal trackers to record their observations using pictures instead (9) **of / up** words. This makes data collection much faster, so larger amounts of high quality information are collected over a shorter period of time.

Hopefully, with new inventions like this available, we will be successful (10) **from / in** helping to save endangered species and the environments they live in.
