meet anyone in real life that you met online.	tell your friends your passwords.
share bad photos of your friends.	think before you share photos.
check your privacy settings regularly.	write mean or horrible messages.

DO ...	DON'T ...

Internet Safety

The internet can be a wonderful tool for you. It can be helpful to do your homework, find practical information, communicate with friends and family, and play educational games. On the other hand, the internet can also cause some serious problems for you. For example, bullies, called **cyberbullies**, can use the internet to be mean to other people. The worst of all is an online predator. This is someone who tries to become your friend with a false name. They might ask you to meet them, but you should never talk to or meet someone your family doesn't know. It could be very **dangerous!** You need to be smart when you use the internet. Always talk to your parents and teachers about any dangers you see.

Exercise 3. Individually, complete this table.
Use information from the text and from the
class discussion.

Internet	
Positive Aspects	Negative Aspects
How can you prevent some of the dangers?	

01/20

Internet Safety

Instruction: "True" or "False"
