

## Algebra Quiz

Once you solve the equation, just enter the number in the answer box.

$$4a + 5 = 49$$

a = \_\_\_\_\_

$$-10 - 5b = -15$$

$b =$  \_\_\_\_\_

$$7 - 6c = 61$$

C =           
(Only enter the **number**. The sign is there for you.)

$$4 + 3d + 4d = 53$$

d = \_\_\_\_\_

|                           |
|---------------------------|
| $\underline{e} + 23 = 30$ |
| 8                         |

e = \_\_\_\_\_

$$8 + 4f = 20 + 15 + f$$

$$f = \underline{\hspace{2cm}}$$
