

# Think Addition to Subtract

Directions: Use the addition facts to check the difference.

$$9 - 4 = \boxed{\phantom{00}} \text{ so } 4 + \boxed{\phantom{00}} = 9$$

$$7 - 4 = \boxed{\phantom{00}} \text{ so } 4 + \boxed{\phantom{00}} = 7$$

$$12 - 8 = \boxed{\phantom{00}} \text{ so } 8 + \boxed{\phantom{00}} = 12$$

$$11 - 6 = \boxed{\phantom{00}} \text{ so } 6 + \boxed{\phantom{00}} = 11$$

Now, make up a problem of your own.

$$\boxed{\phantom{00}} - \boxed{\phantom{00}} = \boxed{\phantom{00}}$$

so  $\boxed{\phantom{00}} + \boxed{\phantom{00}} = \boxed{\phantom{00}}$
